

DVWCT and DVPLT Training Announcement

Title: Basic Chainsaw Safety

Description: According to the Centers for Disease Control and Prevention, there are approximately 36,000 serious chain saw injuries each year. Proper safety equipment and operation can greatly reduce the risk of injury when using a chainsaw. This full day workshop will review safety equipment and how to safely start and operate a chainsaw. It will also review reactive forces, directional felling, limbing and bucking, use of wedges, and storm damage and removal techniques. **Participants are required to bring a hardhat.**
